Benign Prostatic Hypertrophy (BPH)

Curing with herbs and plants

Alternative Medicine for BPH

- 100 percent plant based
- Alcoholic tincture (for oral consumption)
- Grease extract (for external use)

A photograph of a middle-aged man with grey hair and glasses, wearing a light blue sweater, flexing his right bicep. The background is a gradient of blue and teal. There are decorative white elements: a horizontal bar at the top right and a plus sign at the bottom right.

Quick and Lasting Reaction

- More than **150 patients treated**
- 94 % success rate (**141 patients cured**)
- First therapy lasts **36 days**
- **97 % success with first therapy**, few patients required second therapy.

Quick and Lasting Reaction

- Notable effect within **48 hours** of the first dosing.
- Long-term effect, bringing the prostate to its original shape and size.
- Clinically tested it has shown no side effects

Effects and Potency

acts on 3 functions within body

1. Apoptosis – programmed death of damaged or infected cells. Does not harm the good cells.
2. Increase in immune cell ability to identify and eliminate infection.
3. Increase in circulation of blood and lymph around prostate region.

How it works

APOPTOSIS acts by regulating the potential of Mitochondria membrane and release of C3 (cytochrome) from the membrane – as an essential condition for initiation of the programmed cell death.

The process only affects cells with damaged DNA, while leaving healthy cells intact.

1/3

How it works

IMMUNITY increase works throughout the body with anti-inflammatory effect on most of the bacteria, including Staphylococcus Aureus (all types), Escherichia Coli, Pseudomonas Aeruginosa.

The herbs initiate regeneration of blood cells; remodeling and forming of immune cells – which causes their activation.

2/3

How it works

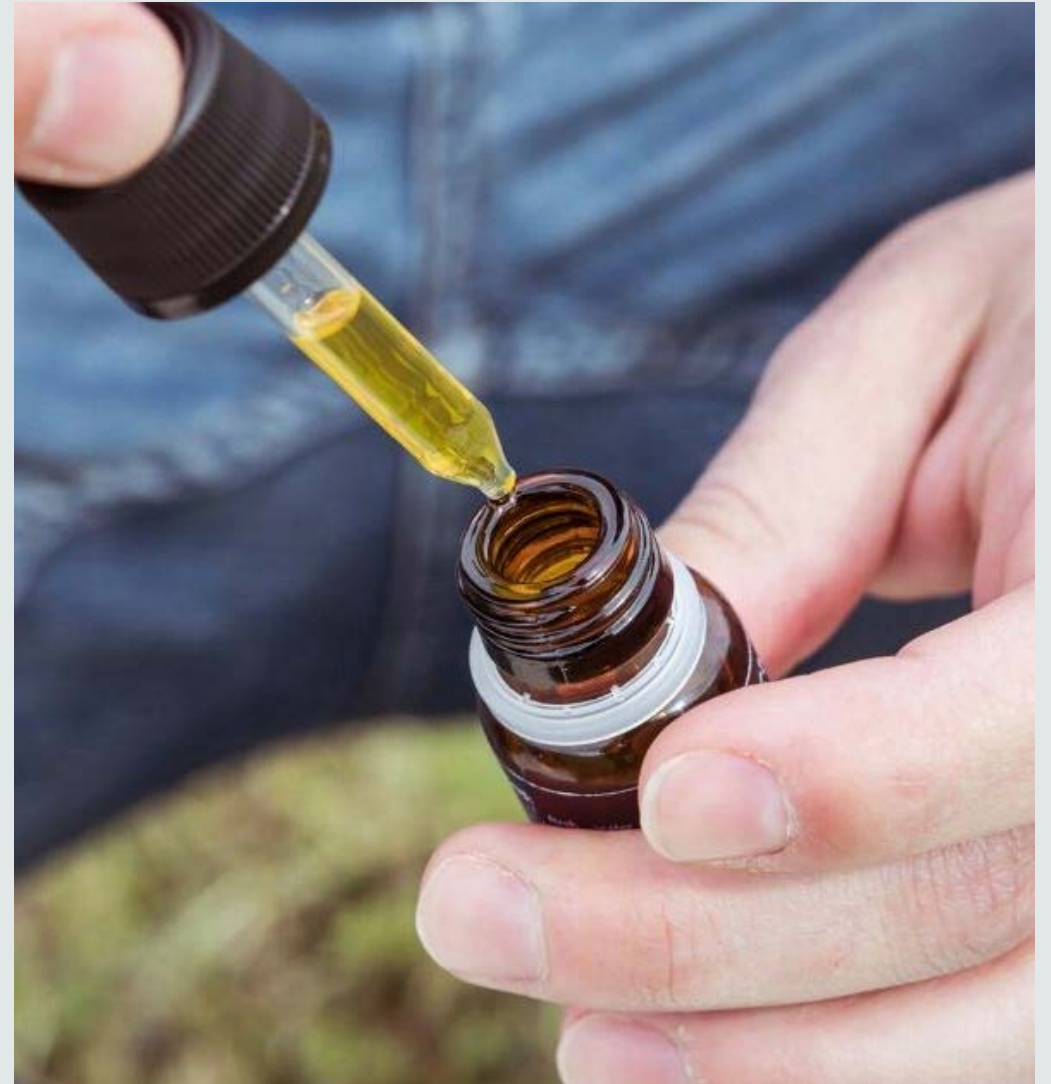

STIMULATION of lymph and blood circulation helps in expelling of toxins from the body while bringing oxygen, thus initiating a diuretic effect causing flow of urine.

Application and Dosage

TINCTURE (3 ml) is diluted in 50 – 80 ml of water and consumed orally twice a day.

GREASY extract is used twice a day externally, in the region of prostate.
