ABSTRACT

According to the concept of Vietnam: "Industrial cluster" (CCN) is an area of concentration of centers of enterprises, industrial - handicraft export services for industrial production - handicrafts; have definite geographical boundaries fixed, not inhabited; invested and built mainly to move, about to arrange and attract production, SMEs, individuals and households locally to invest in production and business; decided by the People's Committees of the provinces and cities establishment" first . Thus, industrial cluster is a form of industrial production organization by territory, it meets the requirements of moving, rearranging, strengthening infrastructure to maintain, to expand and reduce environmental pollution for public production and business - cottage industry in rural areas. The study has raised solutions to promote the speed and quality of industrial infrastructure construction, which are: Improve the quality of the industrial cluster development planning and the detailed planning for constructing the industrial park infrastructure; views and overall measures to solve environmental problems in the process of industrial development.

Key words: industrial cluster, infrastructure, development, Hanoi, Vietnam.
