ABSTRACT

In Hanoi, there are currently 70 industrial clusters (CCNs) operating, contributing significantly to economic growth and ensuring social security. However, besides the CCNs that are invested, built synchronously and strictly managed, there are many CCNs formed many years ago with many shortcomings. In addition to industrial parks that are synchronously invested and strictly managed, there are also many industrial parks with primitive infrastructure systems, poor management, leading to violations of construction order, environmental pollution and pollution. potential risks of fire prevention and fighting. To overcome this situation, in 2018, Hanoi city planned to build a modern industrial cluster network to meet the new wave of investment in the field of industrial production and handicrafts. For speeding up the progress of construction and implementation of investment in construction of technical infrastructure of industrial zones: Develop an investment program to complete technical infrastructure of industrial zones in the city in the period of 2021-2025.

Key words: IC development, industrial clusters, regulations, shortcomings.
